

# arcremote™

universal remote for home devices

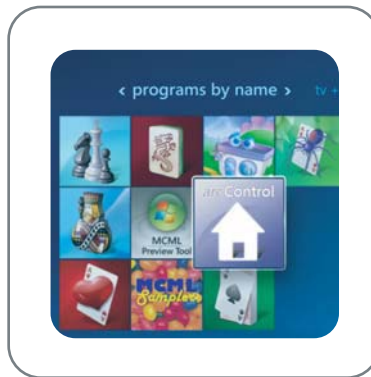

Control your ZigBee wireless devices and Windows Media Center from anywhere in your home. Imagine watching a movie, turning off the lights and locking the front door all from a single remote control. With the combination of the ArcRemote™ and ArcWay™ gateway, you can control Windows Media Center PC directly or browse and queue your play-lists while in another room. The ArcRemote™ is a *two-way* controller with ZigBee and IR capability, allowing it to send *and* receive information from wireless devices and your Windows PC.

ArcRemote™ is a two-way universal remote control for all Zigbee wireless devices in your home. Add the ArcWay™ Zigbee-Ethernet gateway, and control Windows Media Centre and other PC applications from one remote control.

ZigBee compliant devices are automatically controllable by the ArcRemote™...

(Lutron® faceplate pictured. Others available.)

...which also controls Windows Media Center ...

...using the ArcWay™ Zigbee-Ethernet device gateway.
